

Sarah Flanagan, PhD

In 2003 Sarah gained a BSc in Molecular Pathology from the University of Bristol. Since completing her PhD in 2007 Sarah has continued to work with Sian Ellard and Andrew Hattersley at the Peninsula Medical School on the genetics of neonatal diabetes and congenital hyperinsulinism.

As a research fellow Sarah has co-authored over 80 peer-reviewed papers and has been involved in the discovery of 9 novel genetic causes of neonatal diabetes. In 2006 Sarah was part of the team who were awarded the Queen's Anniversary Prize for research that has resulted in hundreds of patients stopping insulin injections and achieving better glycaemic control on sulphonylurea tablets.
